Hi Elain, can you add the attached email to the TRW Microwave Site records?

Thank you,
Michael

I spoke with the attorney for apple.

We are not going to be signing the proposed NDA. She is going to send a letter to me saying that everything you create during the Site Walk (e.g., field notes, photos) is being claimed by Apple as CBI and we will treat it as such under our CBI regulations at 40 CFR Part 2. After the visit, you can send apple back everything you created and they can substantiate their claim. You may want to work with the apple representative while you are there to minimize any creation of CBI. So, for example, if it is possible to take a photo at an angle that wouldn't be claimed as CBI that would get you the info you need, you would probably want to do that.

Let me know if you have any questions.

Thanks.

Hi Matt, FYI below, Apple is very interested in exactly where we want to go in the building. Apparently, this is a product development building with sensitive work underway. Attached are the figures and photos associated with past mitigation measures. I've requested a copy of the NDA, which Rebekah will review and if we can sign. I now also have a Montrose briefing with Enrique at 1-2 pm on Aug 19 that I need to attend, can you do an earlier morning start time? Or, if later, cover some of the site walk for me?

Thanks!
Michael

Michael – I sent them quite a few maps as they were looking for details on each of the areas you want to visit. Here is the list I sent to them and attachments from previous reports that show where these areas are:

1. The sub-slab depressurization system. **Attachment 1** shows the locations of the roof vents and the interior vapor collection riser pipes, which collectively comprise the system.
2. The building's concrete slab and cracks that were sealed to prevent vapor intrusion as well as any building concrete slab penetrations (e.g., from pipes or seams in the building). EPA also asked to see the spaces between the walls of the three sections of the buildings that were sealed in 2014-2015. These items are shown on **Attachment 2**; however, much of this may no longer be accessible.
3. Past indoor air sampling locations (see **Attachment 3**).
4. The location where contaminated soil was excavated from underneath the building (see **Attachment 4**).
5. The location of groundwater monitoring wells (see **Attachment 5**).
6. The location of the previous bioremediation system and injection locations (see **Attachment 6**).

Hi Kurt, I just got the NDA and having it looked at. Can you send me the map you sent Apple showing what we'd be visiting? Thanks, Michael

Michael – We will all be there the night before so early start is no problem. Just let me know what works for you guys. Also, AECOM has an office in downtown San Jose that we could use for meeting space before or after if you think that would be beneficial. There isn't any meeting space that we could use at the Apple building. Just let me know on that as I will need to reserve the AECOM space if we want to use it.

Finally, I spoke with Apple last week and they are very interested in exactly where we want to go in the building. Apparently, this is a product development building with sensitive work underway. Based on your request to me, I forwarded Apple a list of there areas we would want to see and some maps showing where these things are/were. They also told me that they would expect all visitors to sign a Non-Disclosure Agreement and that they would forward the agreement directly to you and Matt Plate via email for signature. Not sure what EPA's position is on signing those, but I am just letting you know what Apple has requested.

Hi Kurt,

Do you have a start time restriction? With traffic it is better for me to have an early morning start. Thanks, Michael

Hi Kurt,

EPA management has approved the site visit. Have a good weekend.

Michael

Hi, Michael – We will have the following people attend:

- Michael Shannon – Northrop Grumman's Corporate Manager, Environmental Remediation.
- Holly Holbrook – AECOM's Project Manager
- Myself – Northrop Grumman's Project Manager

I am expecting we will also have an escort from Apple but I have not yet been able to confirm who that will be. I'll let you know as soon as I hear back from Apple.

Hi Kurt,

Myself and Matt Plate will be able to visit the site on Thursday 8/19. The only caveat is that we both need final approvals for field work considering the current high COVID-19 transmission rates; however, this should not be an issue.

Thank you,
Michael

Hi, Michael – We are available on Thursday 8/19. I am still waiting for confirmation from GI Partners and Apple, but I would not expect there to be any issues with them. I will give you final confirmation on it by the end of the week, but I wanted to go ahead and let you know that 8/19 is looking the best for us. We will plan to arrive the evening before so could start as early as you would like in the AM.

Subject: Site visit: TRW Microwave Site 825 Stewart Drive building

Hi Kurt,

EPA requests a site walk and inspection visit of the TRW Microwave Site 825 Stewart Drive building. Can you arrange for EPA access to the building from the current property owner, which I believe is GI DC Sunnyvale LLC? Myself and Matt Plate with EPA request reasonable access to visit the items addressed in the attached annual inspection memo and the 2014-2015 building mitigation measures that addressed the potential for vapor intrusion into the building, which included:

- The sub-slab depressurization system that was installed underneath the site building to vent vapors to the atmosphere.
- The building's concrete slab and cracks that were sealed to prevent vapor intrusion. As well as any building concrete slab penetrations (e.g., from pipes or seams in the building).
- Past indoor air sampling locations.
- The location where contaminated soil was excavated from underneath the building.
- The spaces between the walls of the three sections of the buildings that were sealed in 2014-2015.
- The emulsified vegetable oil in-situ bioremediation system.
- The location of groundwater monitoring wells.

EPA also wants to review any post 2014-2015 building modifications or changes to the building.

Can you get back to me this week with some dates for a site visit in August? Northrup Grumman and your consultant are also invited to attend, understanding that there may be COVID-19 related restrictions in how many people can visit the building or congregate. I am available for a site visit any week, except for August 9-11 and the week of August 23-27 and Matt Plate typically has limited availability on Fridays.

Feel free to call me to go over,
Thank you,

Michael Schulman
